# Kabidu Munguakonkwa sage

## Full stack developer

I design modern, high-performance, and scalable web applications. My goal is to join a dynamic team where I can leverage my skills in API integration, back-end and front-end architecture, and scalable deployment, while contributing to projects focused on user experience, code quality, and technical innovation

## Professional Experience

### Full-Stack Developer

From October 2020 to May 2021 — **Congo Cloud Computer**, Bukavu, South Kivu, DRC

- Collaborated with product and design teams to create intuitive and functional user interfaces.
- Implemented automated tests to ensure the quality and robustness of the developed code.

### Training Assistant

Training Assistant — **Eurêka Services**, Bukavu, South Kivu, DRC

*February 2022 – August 2023*

- Assisted the lead trainer in preparing and organizing training sessions.
- Contributed to the development of training materials tailored to learners' needs.
- Conducted practical workshops and small-group training sessions.
- Managed training logistics, including equipment and training spaces.

## Education

### Bachelor's Degree in Computer Science

Université de la Nouvelle Paix, Bukavu, South Kivu, DRC  
September 2017 – December 2021

### State Diploma in General Pedagogy

Institut Uwezo, North Kivu, DRC  
September 2016 – July 2017

### Certificate of Completion of Primary Education

Ecole Moderne Uwezo, North Kivu, DRC  
September 2004 – July 2010

## Skills

### HTML5/CSS3 & UI Framework

- Proficient in responsive design using Flexbox
- Experienced in using Bootstrap

### React.Js

- Developed functional and class-based components
- Managed global state using Redux
- Utilized React hooks effectively

### Capacitor(Ionic)

- Integrated Capacitor to convert React apps into native mobile applications
- Utilized Capacitor plugins for extended functionality
- Deployed applications on Android and iOS platforms

### JavaScript

- Proficient with modern JavaScript features: arrow functions, destructuring, and promises
- Strong understanding of the DOM, event handling, and API calls (fetch, axios)

### Django & Django Rest Framework

- Created and managed models, views, serializers, permissions, and routes
- Developed robust and secure RESTful APIs
- Implemented JWT and session-based authentication
- Documented APIs using Swagger

### Tools & Environment

- Proficient with Git and GitHub
- Experienced with virtual environments (venv)
- Skilled in dependency and version management

### Databases

- PostgreSQL, MySQL, SQLite
- Django ORM: complex queries, migrations, and performance optimization

### Deployment & Containerization

- Containerization using Docker
- Deployment on Heroku and AWS

## Other Skills / Tools

### Microsoft Office

### ODK Collect

### Photoshop

### KoboCollect

## Projects

### Site Web FreeDev

Built a modern web application with a full-stack architecture, featuring dynamic interfaces and robust APIs to ensure a seamless user experience and efficient data management.

[Abidusage/App](#)

### Mobile App GroupMe

Built a secure mobile group messaging app with Ionic React frontend and Django REST API backend, providing a responsive interface for seamless group communication.
