PROJECTS

Mobile app GroupMe

⌚ 2025 - Present ⚽ Bukavu

Built a secure mobile group messaging app with Ionic React front-end and Django REST API backend, providing a responsive for seamless group communication.

Freedev

⌚ 2025 - Present ⚽ Github

Built a modern web site with a full-stack architecture, featuring Dynamic interfaces and robust APIs to ensure a seamless user experience and efficient data management.

abidusageportfolio

⌚ 2025 - Present ⚽ Github

Development of an interactive portfolio website showcasing my web projects, technical skills, and professional background.

This project was designed to demonstrate my ability to build a complete application front-end with a strong focus

Certification.

Python foundation

Great learning
